## EMPLOYMENT HISTORY

### Ascentium Corporation

Jul. 2006 — Present

Senior Web Developer

Spokane, WA

- Architect and develop large scale, high profile B2B and B2C web applications for national entities including Microsoft, Motorola, AT&T and Super 8.
- Formulate and define scope, objectives and technical direction for web applications and help lead systems analysis, design, development and implementation efforts.
- Implement SEO best practices to help clients capitalize on the benefits of organic search.
- Developed Tournament Management System for Spokane Hoopfest that is responsible for the registration and bracketing of over 6,400 teams and 27,000 players. System utilizes an extensive team/player validation engine that not only guarantees data integrity, but ensures the teams are ranked according to the aggregate of the player's abilities.

### Spokane Teachers Credit Union

Feb 2005 — Jul 2006

Web Engineer

Spokane, WA

- Managed enterprise web systems and disaster recovery plans for a credit union with over \$1 billion in assets.
- Responsible for the development, implementation, security and maintenance of multiple load-balanced web sites serving 80,000+ members and 300+ employees.
- Built, secured and maintained over 20 web and database servers.
- Lead simultaneous cross-functional teams on important web and operational projects.
- Researched, evaluated and implemented web technologies for several areas of the organization.
- Installed and administered SharePoint intranet system and helped lead migration from SharePoint 2001 to SharePoint 2003.

### Starbucks Corporation

Sept. 1995 — Feb 2005

SKU Systems Analyst

Seattle, WA

- Maintained retail Point of Sale (POS) menu and tax systems for all North American retail stores.
- Maintained JDA SKU system.
- Provided QA for POS store builds and deployment.

### N-Tier Design / Click Management, Inc

Sept. 2001 — Present

Owner

Spokane, WA
